Black Grey, 114mm, full height with mid rail

"Simply the best company in the world – great products and amazingly friendly, efficient and reliable staff. They seem to effortlessly do what other companies can't"

Paul from London

Cream Grey, tier-on-tier, 89mm

Vivid White, hidden rod, 89mm

Grey White, french doors, 89mm

Custom colour, tier-on-tier, 64mm

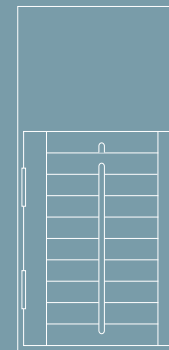

Cream, full height, 64mm

Vivid White, full height, 89mm

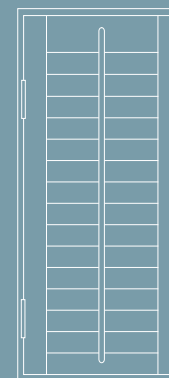

Styles

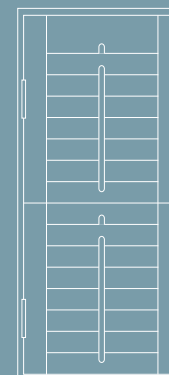

Café-style shutters

The shutter for stylish street-front rooms. Covering only the lower half of your window, café-style shutters keep prying eyes out but still let the light flood into your room. Ideal for anyone who wants to keep their curtains open but gain some privacy.

Full-height shutters

Add clean lines and an elegant finish to any window or door with our full-height shutters. In many cases, fitting a mid-rail increases the practical and aesthetic benefits of this style.

Tier-on-tier shutters

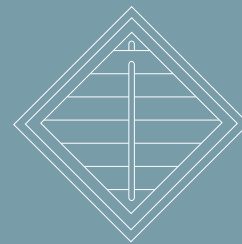

Versatility is the word for our tier-on-tier shutters. The upper and lower panels can be opened independently for greater privacy and light control at all times of day. Perfect for homes with windows near the street.

Styles

Solid shutters

Inspired by the Victorian era, the solid panel design of the original UK shutter style comes with plenty of pluses. As well as achieving total privacy when closed, they act as an extra barrier against noise and weather – the ultimate in snug, secure home comfort.

Shapes

Arches. Hexagons. Circles. Triangles. Awkward angles. Whatever the peculiar shape of your window, we'll make a shutter to fit it. Plus don't think for a second that you have to settle for a blind on your Velux® window – we can even make a wooden shutter for that.

Tracks and doors

We offer a variety of options to spruce up any door set. A tracked formation is just the thing for a large run of glass or room divider, with shutters that slide majestically aside to reveal the full space behind.

Custom colours, solid raised panels

Custom colour, speciality shape, 64mm

Chocolate stain, café style, 64mm

Traffic White, 89mm Slats

Custom colour, solid raised panels

"One of the most professional companies I've dealt with in a long time. I am really fussy about customer service and will always have a bit of a whinge if things don't come up to scratch, but I can honestly say the quality of service has been superb"

Emma from Chiswick, London.

Combination shutter, Solid shaker & 76mm, Traffic Grey

Custom Pink, 114mm Slats

Traffic White, central rod, 89mm

Our Shutters

Our ranges are designed with style and simplicity in mind. Measured, manufactured and fitted exclusively by Shutterly Fabulous, they're aimed at all tastes and budgets. Premium kiln-dried hardwoods guarantee longevity and durability across every range. Quality control is too important to us to offer any MDF shutters.

Shutter Ranges

Painted Hardwood

Fast-growing Paulownia has a smooth, even grain that adds strength and beauty to our core range. Shutters made from this lightweight timber are perfect for hanging across large windows and doorways, while any custom shape can be catered for.

Stained Hardwood

Create a truly elegant look with our beautiful wood stains, made to measure for doors and windows of any size and shape. Choose our Limewash Grained Finish when your decor has a rustic or a shabby chic vibe. This wood has a driftwood appearance and may be the perfect look you require.

Waterproof Polyvinyl

Perfect for sizzling kitchens and steamy bathrooms, our Polyvinyl range is waterproof and impervious to moisture. Hardwearing and durable. With two glorious shades of white to choose from, they will fit beautifully into any room.

Slat Sizes

We offer 4 different slat sizes 64mm, 76mm, 89mm, 114mm. Your choice will be based upon your design preference or perhaps the size of your window.

- 64mm - This classic slat size works well on smaller windows or cafe style.
- 76mm - Our best selling slat size suits all windows large and small, balancing light and privacy beautifully.
- 89mm - Contemporary, stylish and practical. Works well on large windows and doors.
- 114mm - As tastes change, we're seeing more customers make a statement with these larger slats.

Custom Colour Service

Make the ultimate statement with our unique colour-matching service. Tie your shutters into the colour scheme of your room. Create dramatic contrasts with furniture or accessories.

Bring your inimitable interiors vision to life. Don't worry about second guessing – we'll have a sample mixed, sprayed onto a shutter slat, and a photograph sent to you for approval.

Natural Wood Stain, 89mm

Custom colour, peacock paint, 114mm

"A fantastic experience from contact to completion. I would not hesitate to recommend Shutterly Fabulous. Great staff, great product and really great prices"

Chris from Tunbridge Wells

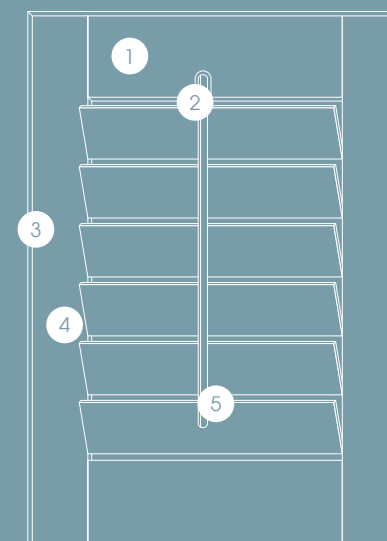

Custom colour, solid raised style shutters

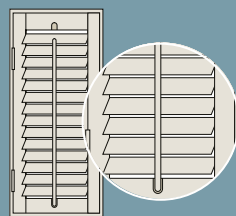

Get to know our shutters

They're about to make a big impact on your life, so it's worth taking a closer look. Explore our hardwood plantation shutters in detail and see why they're such a great choice for your home.

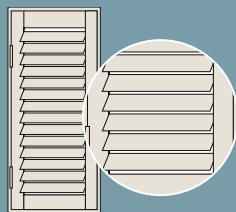

- 1 Top and bottom rails enclose the slats to form the panel. (You can add a middle rail if you like.)
- 2 Front push rods sit in a recessed mouse hole on the top rail when slats are shut.
- 3 The frame houses the panel; it can fix directly onto your window frame or into a window recess.
- 4 Vertical rails either side of the panel are called stiles.
- 5 The front push rod is a thin wooden bar connected to the slats, controlling their position when moved up or down.

Shutter Control Rod Options

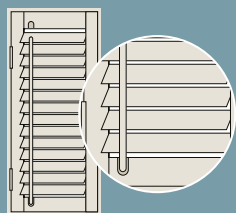

Front Tilt Rod

The tilt rod is the vertical piece of wood which links the shutter slats together and allows all slats linked by that particular rod to open and close in unison. A front tilt rod is normally sited in the centre of the panel, but can be ordered offset to the side. There is no surcharge for the front tilt rod.

Hidden Tilt Rod

The hidden rod is the term given to the shutters which have a tilt rod completely hidden inside the stile of the shutter panel. To open and close the slats, you simply adjust any one of the slats and all slats attached to that rod will open in unison. Please note there is a 10% surcharge for the hidden tilt rod.

Offset Tilt Rod

The standard distance for an offset tilt rod is 25mm from the end of the louvre, on the hinged side. Please note there is a 5% surcharge for the offset tilt rod.

“I particularly liked the way they offered a ‘ballpark’ quote without obligation – so many companies won’t give you a clue until you’ve taken the day off work for them to measure up. No hard sell, just a fantastic service and product at a reasonable price”

Cheryl from Wilmslow

Shaker Style Solid shutters, Monochrome Ombre

Stains & paints

Fabulous finishes are all part of the service, with a wealth of beautiful paint and stain options to choose from.

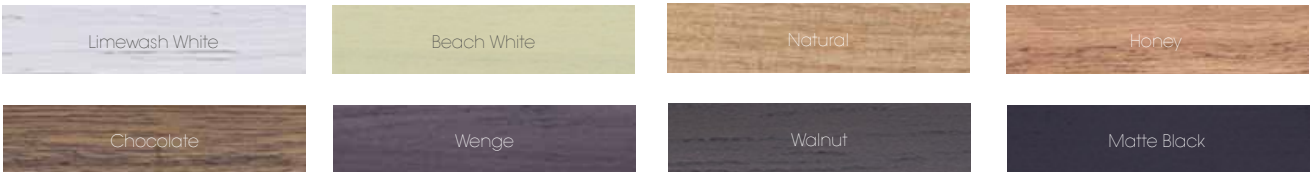

Painted Hardwood Finish

Fast-growing Paulownia is a strong yet lightweight timber, ideal for large interior doorways and windows. In our experience, no shutter timber is stronger or more durable. But that’s not to say Paulownia is heavy-duty. It’s a subtle, elegant wood with an even grain that takes both paint and stain finishes exquisitely. Best across large spaces, this range can custom-fit practically any shape. No wonder the Painted Hardwood range is our most popular shutter.

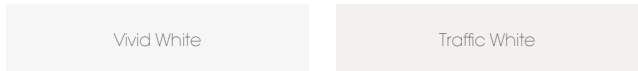

Stained Hardwood Finish

Choose the deep, sweeping grain finish in the Paulownia timber and treat your windows to the ultimate in natural-wood shutter elegance. Our Stained Hardwood shutters are made from a luxurious variant of Paulownia timber with a natural wood effect that is best accentuated by a rich stained finish; we offer a range of refined tones. These shutters with their diverse deep grains give you a rustic, yet sophisticated finish, that will turn any window or door into the standout feature of your home (and attract plenty of envious glances from the street).

Polyvinyl Waterproof Finish

Easy to clean and impervious to moisture, these shutters are the great-looking hardwearing choice for your wet room or bathroom windows that come into direct contact with water.

Hinge Finish

*Magnet plates on the shutter frame will match the selected hinge finish.

Custom colours

If you’re thinking of going off-piste, that’s where the colour charts come in! We are delighted to offer a colour matching service. Discuss more with your consultant. An additional charge and slightly longer lead times apply on custom orders.

Why choose us?

The closer you get, the better it looks. We firmly believe this applies equally to our shutters and our company. Our products reveal a level of craftsmanship, care and attention unrivalled in UK shutters. Just as importantly, we put our all into being the most reliable, dedicated and pleasant shutter company you could wish to work with. Of course, every customer's experience is different*, but here are a few of the things that set us apart.

Shutterly Fabulous from A to Z

We're proudly independent. You can trust us to take care of your order from start to finish, safe in the knowledge that your shutters have been designed, measured, made and fitted expertly and exclusively by us.

A pleasure to work with

Choosing shutters for your home is both an investment and an experience you want to enjoy. We promise to keep things simple and satisfying. We won't bamboozle you with endless catalogues of products and different materials. With us you get premium-grade hardwood shutters – nothing less, nothing else.

Your shutters, your way

Our collection of shutters can be made to fit any window and doorway, and installed in the most unlikely spaces. You can even add nifty design elements like hidden push rods, and fashionably wide louvres.

Our price promise

Our transparent pricing policy means we can give you a quote before you book your free design consultation. We guarantee it will be a great one; having our own manufacturing facility means we can keep our costs right down and match any like-for-like UK quote.
